

SWAZI MBALENHLE DLAMINI

Frontend Developer · Data & Business Analyst · Web Developer
Swazidlams1234@gmail.com · 081 068 7141 · Johannesburg, South Africa

PROFILE

BCom Information Systems student at the University of Johannesburg, passionate about building web applications and solving real-world problems through technology.

Experienced in frontend development, data analytics, and database design — with a track record of delivering complete, deployed projects. Comfortable presenting technical solutions to professional stakeholders and collaborating in team environments.

Currently seeking frontend, web development, data analyst, or business analyst opportunities.

TECHNICAL SKILLS

Languages: HTML, CSS, JavaScript, Python, SQL

Tools & Software: Microsoft Excel, Word, PowerPoint, Access, Outlook

Competencies: Frontend Development, Data Analysis, Database Design, Business Analysis, Problem-Solving

Soft Skills: Team Collaboration, Professional Presentations, Communication, Time Management

Languages Spoken: English (fluent) · isiZulu (home language)

PROJECTS

CourseCompass — Student Pathway Web Application 2026 – Present

Final Year Group Project · Role: Frontend Developer · Status: In Development

- Co-developing a web application that guides students from Grade 9 through to post-matric, helping them explore university opportunities and alternative career pathways.
- Responsible for frontend development — designing and building the user interface using HTML, CSS, and JavaScript to create a clear, engaging experience for young learners.
- Collaborated closely with team members across design, logic, and data layers; contributed to planning, feature development, and milestone presentations.

SpendLessBro — University Student Budget Tracker 2026

Personal Project · Role: Sole Developer · Status: Complete & Live

- Designed and built a fully functional budget tracking web application from scratch, tailored specifically to university students managing monthly income and expenses.
- Implemented features including expense logging, income tracking, and spending summaries — deployed as a live application demonstrating full end-to-end ownership.
- Independently managed the entire product lifecycle: ideation, UI design, development, testing, and deployment.

Interactive Web Calculator 2025

Personal Project · Technologies: HTML, CSS, JavaScript · Status: Complete

- Built a fully functional browser-based calculator applying core JavaScript principles including DOM manipulation, event-driven programming, and responsive layout design.

EDUCATION

BCom in Information Systems Feb 2024 – Present

University of Johannesburg, Johannesburg, South Africa

- Developed proficiency in business data management, database design, and data analytics to support real-world decision-making.
- Applied database modelling end-to-end: identified and analysed business problems, designed Entity-Relationship Diagrams (ERDs), and translated them into fully functional SQL database code.
- Completed a web application project, taking the lead on frontend development using HTML, CSS, and JavaScript.
- Presented prototypes and solutions to professional stakeholders, developing strong public speaking and communication skills.

- Engaged in collaborative group projects simulating industry workflows, strengthening teamwork, planning, and documentation abilities.

National Senior Certificate — Bachelor's Pass

Jan 2019 – Nov 2023

Menzi High School, Durban

- Achieved a Bachelor's Pass with strong performance in Mathematics, Physical Sciences, and English.

WORK EXPERIENCE

Stylist — Kingsley Heath, Pavilion Mall, Durban

Dec 2025

- Provided personalised customer service, assisting with clothing selection, sizing, and styling.
- Operated POS system — processed payments, registered customers, and managed till accurately under pressure.
- Conducted stock checks, unpacked deliveries, and maintained visually appealing merchandise displays.
- Collaborated with the store team to maintain smooth daily operations during a high-traffic retail period.

CERTIFICATIONS

General AI Course for Software Engineers — WeThinkCode

Oct 2025

- Gained foundational skills in generative AI, prompt engineering, and integrating AI tools into software development workflows.
